

# Sebastian Rowan

PH.D CANDIDATE IN CIVIL AND ENVIRONMENTAL ENGINEERING

University of New Hampshire, Durham, NH

📍 He/Him | ✉ sebastian.rowan@unh.edu | 🏠 sebastianrowan.github.io | 📱 sebastianrowan | 📧 sebastian-rowan-72490170

*I am Ph.D. candidate in civil and environmental engineering researching the impacts of flood events and climate change on people and communities. The goal of my research is to develop a more comprehensive understanding of the risks posed by floods to enable the development of mitigation efforts that prioritize long-term sustainability and community well-being.*

## Education

### University of New Hampshire

Durham, New Hampshire

PH.D. CANDIDATE, CIVIL AND ENVIRONMENTAL ENGINEERING

2026

- Dissertation Title: Towards Sustainable Flood Risk Management: Incorporating Uncertainty and Environmental Impacts
- Developed model to estimate economic loss and greenhouse gas emissions from flood exposure to residential buildings using component-level fragility estimates
- Quantified expected GHG emissions from flood exposure to residential buildings under current and future climate projections in a nation-wide, multi-frequency flood risk assessment

### University of New Hampshire

Durham, New Hampshire

B.S. ENVIRONMENTAL ENGINEERING

2016

## Experience

### U.S. Army Corps of Engineers, Engineer Research Development Center

Vicksburg, MS

ORISE GRADUATE RESEARCH FELLOW

Sep. 2020 - Present

- Implemented method to estimate greenhouse gas emissions from flood damage in USACE'S "go-consequences" flood consequence analysis tool
- Co-lead economic consequence and social vulnerability analysis of future flooding in the Mississippi River Valley
- Lead systematic literature review and meta-analysis to assess the effect of home damage on post-flood psychiatric morbidity to support USACE effort to comprehensively assess "Other Social Effects" of floods for planning studies
- Performed data analysis using social vulnerability and other geospatial data to support Tier 1 Other Social Effects/Environmental Justice Analysis for the USACE New York/New Jersey Harbors and Tributaries Coastal Storm Risk Management Feasibility Study

### University of New Hampshire

Durham, NH

RESEARCH & TEACHING ASSISTANT

Aug. 2018 - Dec. 2020

- (RA) Resilient Bridge Planning in Mozambique - Bridge Failure Risk from Flooding and Climate Change
- (TA) CEE 705: Introduction to Sustainable Engineering (Fall 2019, Fall 2020)
- (TA) CEE 502: Project Engineering (Spring 2019)

### New Hampshire Department of Transportation, Bureau of Planning and Community Assistance

Concord, NH

CIVIL ENGINEER I-II

2016 - 2018

### University of New Hampshire InterOperability Laboratory

Durham, NH

10 GIGABIT ETHERNET TECHNICIAN

2014-2017

### New Hampshire Department of Environmental Services, Air Resources Division

Concord, NH

ENVIRONMENTAL TECHNICIAN

2015

## Awards

3RD PLACE - UNH 3-MINUTE THESIS (3MT) COMPETITION

2025

Oral Presentation.

## Open Source Projects

### SVIBUILD R

Active

- An R package that allows users to download or construct the CDC's Social Vulnerability Index as a tidyverse or simple features data frame.
- Enables greater flexibility in region selection for SVI analyses than is possible with state- or national-level datasets hosted by CDC.

### NSI DATA QGIS PLUGIN

Active

- A QGIS plugin that downloads data from the USACE National Structures Inventory for a specified region and adds it to a map.

### NSIPY

Active

- A Python package to download data from the U.S. Army Corps of Engineers National Structures Inventory using the NSI API.

## Skills

### PROGRAMMING LANGUAGES

- Python, R, Go, SQL, MATLAB

### SOFTWARE

- QGIS, ArcGIS, go-consequences, Vensim, NVivo, Excel
